PROFESSIONAL SUMMARY

M.Sc. Software Systems student with an 8.0 CGPA and hands-on experience in full-stack web development, AI/ML, real-time systems, ERP platforms and IoT applications. Currently gaining industry experience as a Software Development Intern at DC Innovision Private Limited, with projects spanning React, Node.js, Python, PHP, Laravel, databases, computer vision and real-time application development.

TECHNICAL SKILLS

Languages	JavaScript, Python, Java, C, C++, PHP, SQL, HTML5, CSS3
Frontend	React.js, React 19, React Router, Tailwind CSS, Bootstrap, Vite, JavaScript ES6+
Backend	Node.js, Express.js, PHP, Laravel, Python Flask, REST APIs
Databases	MySQL, PostgreSQL, MongoDB, Prisma, Mongoose
AI / ML / CV	Machine Learning, SHAP, InsightFace, OpenCV, ONNX Runtime, NumPy, Chart.js
IoT / Real-Time	Socket.IO, NFC/RFID, IoT telemetry, Three.js, React Three Fiber
Tools & Security	Git, GitHub, Postman, Docker, JWT, RBAC, Bcrypt, PDO, Zod

EDUCATION

Kongu Engineering College, Perundurai | M.Sc. Software Systems | 2023 – 2028 | CGPA: 8.0

S.S.M. Lakshmi Ammal Matriculation Higher Secondary School | SSLC & HSC | 2021 – 2023 | 82%

INDUSTRY EXPERIENCE

DC Innovision Private Limited | Software Development Intern | 2026 – Present

SnapShare — AI-Powered Event Photo Sharing & Retrieval Platform | React 19, Node.js, Express, Python, Flask, InsightFace, OpenCV, MongoDB, MinIO

- Built a multi-tenant event photography SaaS that uses selfie-based facial recognition to retrieve guest photos from large event collections.
- Integrated a Python InsightFace computer-vision microservice for facial embeddings and similarity matching, with JWT authentication, RBAC, QR event access and S3-compatible object storage.

FactoryOS — Real-Time Smart Factory ERP & IoT MES Platform | TypeScript, React 19, Node.js, Express, PostgreSQL, Prisma, Socket.IO, Three.js

- Developed an end-to-end MES/ERP spanning 22+ relational domain models for production orders, bundles, machines, workforce and quality control.
- Built a 3D factory digital twin and real-time IoT/NFC workflow using Three.js/React Three Fiber and Socket.IO for live machine telemetry, operator scans and production status.

CampusCore ERP — Enterprise School & Operations Management Platform | PHP, Laravel 12, MySQL, Blade, Alpine.js, Tailwind CSS, Spatie RBAC, DomPDF

- Developed an institutional ERP covering 14+ modules including admissions, fees, examinations, HR/payroll, LMS and campus logistics.
- Engineered relational business workflows with 146+ Eloquent models, automated fee/payroll processing, QR document generation and granular RBAC.

DASA TECH — Enterprise Digital Platform & IoT Automation Suite (Ongoing) | React 18, JavaScript, Vite, Tailwind CSS, Framer Motion, Lenis

- Currently developing an enterprise platform presenting 7 IoT automation verticals through interactive product experiences and responsive web interfaces.
- Built interactive telemetry simulations, multi-theme UI components, custom client-side routing and lead-generation workflows for IoT automation offerings.

SELECTED PROJECTS

Smart Parking Slot Reservation & Management System | *PHP, MySQL, JavaScript, AJAX, Bootstrap, Chart.js, QRious*

- Developed a full-stack parking platform with multi-category slot allocation, overlap-based double-booking prevention, AJAX reservations, QR parking passes and admin analytics.

FILE FLUX — Universal File Conversion Platform | *React, Node.js, Express, MongoDB, Multer, Sharp, XLSX*

- Built a multi-format file conversion platform for spreadsheet, data, document and image workflows with drag-and-drop uploads, validation, REST APIs and temporary-file cleanup.

Anti-Ticket — Project & Issue Tracking System | *PHP, MySQL, JavaScript, REST APIs, Chart.js, RBAC*

- Developed project/module/ticket lifecycle management with granular RBAC, asynchronous Fetch APIs, analytics dashboards, audit logging and secure database access.

Face Recognition System | *Real-time facial recognition, image processing*

- Developed a real-time facial recognition workflow with live image capture and a large facial image dataset generated from live photographs.

Research Project — Explainable Hybrid Ensemble Learning Framework for Employee Turnover Prediction | *Python, LightGBM, XGBoost, CatBoost, SHAP*

- Developing an explainable employee-turnover prediction framework using adaptive feature engineering, ensemble learning and SHAP to identify influential factors behind turnover predictions.

CERTIFICATIONS

- Oracle Certified Foundations Associate – Java | Oracle University | 2026
- Certificate Program in Testing Tools / Selenium with Java & Python / API Testing – Gold | FutureSkills Prime / NASSCOM | 2025
- Data Analytics Job Simulation | Deloitte / Forage | 2026
- Intro to Machine Learning | Kaggle | 2026
- Step-by-Step Machine Learning with Python | Infosys Springboard | 2026
- Cloud & Cybersecurity Basics | Redrob | 2026

ACHIEVEMENTS & ACTIVITIES

- College-level finalist, Smart India Hackathon (SIH) 2024 — proposed an escrow-based freelancing platform.
- Presented a project at Kongu Engineering College Techno Cultural Fest 2025.
- Participated in NEXUS'25, a national-level technical symposium.
- Participated in HACKWAVE-24 Hackathon conducted by the Coding Club of CT-PG.
